

Product Highlights

- Rated to 150°C
- Low temperature flexibility to -70°C
- VW-1
- UL Recognized Component
- CSA File #LR52852
- Does not trap heat or humidity
- Rot-free
- Self-fitting over many shapes and sizes

Expando[®] HR

Self-fitting Protective Oversleeve

Bentley-Harris[®] Expando products are tough, lightweight oversleeves used to protect cable assemblies, hoses and wire harnesses from chafing, cutting and abrading. The open-weave construction of Expando products enables each size to expand to fit several application shapes and sizes. This open-weave construction also makes them highly flexible and resistant to trapping water, heat and humidity.

Expando HR is a braided Halar* (E-CTFE) fluoropolymer sleeving designed for applications up to 150°C. Inherently flame-retardant, it is UL recognized as a VW-1 component, and will not melt and drip on direct exposure to flame. Expando HR is a special purpose, highly reliable sleeving for military and aerospace oriented applications. It offers good mechanical properties, performs well in both high and low temperature environments, and has outstanding chemical resistance.

Expando HR protective oversleeve has many uses in the aerospace, marine, electronic, military, nuclear and general manufacturing industries.
